Random Number Generator Certificate

Operator: Casino Web Scripts

Operator URL: www.casinowebscripts.com

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) by Casino Web Scripts and found that the RNG complies with the relevant standards.*

The RNG uses a well known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated scaling for slots, keno, roulette, hilo, dice, lotto-bingo, lottery and scratch card games. iTech Labs has also evaluated card shuffling for single deck, 2 decks, 4 decks and 8 decks card games.

The scaling/shuffling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the number and card sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

iTech Labs Australia

24 March 2014

* The RNG was tested according to the UK Gambling Commission Standards - Remote gambling and software technical standards.

Disclaimer.
While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
