

## Casino Game Logs Audit Report

### The Directors

Cassava Enterprises (Gibraltar) Limited; 888 Holdings Plc  
Suite 601-701, Europort  
Gibraltar

This is to confirm that [iTech Labs](#) has examined the game logs for [Casino-on-Net](#) games for the period May 01, 2007 to May 31, 2007 as recorded by the respective game servers. iTech Labs has also calculated the Return To Player (RTP) for all games from the game logs. The calculated RTPs are given in the table below.

URLs: [www.casino-on-net.com](http://www.casino-on-net.com) [www.888.com](http://www.888.com)

Game Name	Actual RTP
Craps	96.99%
Baccarat	98.02%
Blackjack	98.22%
Roulette	97.32%
Slots	92.76%
Video Poker, Power Video Poker	96.67%
Video slot	95.70%
All other games combined*	95.97%
Average payout for all games	96.95%

\* 'All other games combined' includes Keno, Pai Gow Poker and Caribbean Poker.

The actual RTPs shown are percentages of total actual winnings to bets for each game type during the month of May 2007. They do not reflect outcomes for individual games or future games.

iTech Labs has done limited sanity checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes. For each of the RTP calculation shown above, there were sufficient game records to make the actual RTP calculation statistically meaningful. The actual RTPs are greater than normally required by gaming jurisdictions. For all card games, the actual RTPs are very close to the maximum theoretical expectation.

The scope of the review did not include reviews of financial controls or casino operations. We believe that the RTPs were calculated correctly from the game logs based on the actual bets and winnings.
