

Casino Game Logs Audit Report

The Directors

Cassava Enterprises (Gibraltar) Limited; 888 Holdings Plc
Suite 601-701, Europort
Gibraltar

This is to confirm that [iTech Labs](#) has examined the game logs for [Pacific Poker](#) Blackjack game for the period March 1, 2007 to March 31, 2007 as recorded by the respective game servers. iTech Labs has also calculated the Return To Player (RTP) for Blackjack game from the game logs. The calculated RTP is given in the table below.

URLs: www.pacificpoker.com www.888.com

Game Name	RTP
Blackjack	97.75%

The actual RTP shown is a percentage of total actual winnings to bets for Blackjack game during the month of March, 2007. It does not reflect outcomes for individual games or future games.

iTech Labs has done limited sanity checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes. There were sufficient game records to make the actual RTP calculation statistically meaningful. The actual RTP is greater than normally required by gaming jurisdictions and very close to the maximum theoretical expectation.

The scope of the review did not include reviews of financial controls or casino operations. We believe that the RTP was calculated correctly from the game logs based on the actual bets and winnings.

Signed:

A handwritten signature in black ink, appearing to read "G. Y. Nicoll".
