

Random Number Generator Certificate

Software Provider: Cyber Gaming Software Technologies Pvt. Ltd.

Software Provider URL: www.icybergame.com

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) by Cyber Gaming Software Technologies Pvt. Ltd. and found that the RNG complies with the relevant standards.*

The RNG uses a well known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated scaling for craps, roulette, sicbo and slots. iTech Labs has also evaluated card shuffling for single deck 52 cards and single deck 32 cards games.

The scaling/shuffling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the number and card sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

* The RNG was tested according to Malta LGA Remote Gaming Regulations, UK Gambling Commission Standards and Isle of Man Technical Standards.

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
