

Random Number Generator Certificate

Operator: [LuckySkill.com](http://www.luckyskill.com)

URL: <http://www.luckyskill.com>

This is to certify that [iTech Labs](http://www.itechlabs.com) have evaluated the Random Number Generator (RNG) used for generating Die numbers for the LuckySkill Backgammon games and found that the RNG complies with the relevant iTech Labs standards*.

The RNG used for Backgammon games, uses a widely recognized algorithm to generate the random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs have also evaluated the scaling of the RNG generated numbers. Samples of scaled numbers as 'single die values' and 'ordered pairs' have passed Chi-squared tests. iTech Labs have found that the die numbers are unpredictable and non-repeatable.

* A high level description of iTech Labs Technical Standards is available at http://www.itechlabs.com.au/gaming/iTech_Labs_IGS_Standards.pdf

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs have conducted a level of testing appropriate for a component test of this type.
