This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) by MEDIAGAMBLE S.R.L and found that the RNG complies with the relevant standards.*

The RNG uses a well known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated card shuffling (1, 2, 4, 6, and 8 decks without joker) and scaling for Slot, Keno, Roulette and Scratch and Lottery games.

The scaling/shuffling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the card and number sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.
