Random Number Generator Certificate

Operator: Play Games24x7 Private Limited   **URL:** www.rummycircle.com

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) used by Play Games24x7 Private Limited and found that the RNG complies with the relevant standards.*

The RNG uses a widely recognized algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated shuffling for single deck and 2 decks games. Our shuffling tests ensure randomness for all cards dealt from the shuffled decks (initial deck created before the game starts and the partial deck created from open cards). The shuffling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the card sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

iTech Labs Australia

02 July 2012

* The RNG was tested according to UK Gaming Commission, Isle of Man and Malta requirements.

Disclaimer.
While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
