

Random Number Generator Certificate

Operator: Silver Sands Online Poker

URL: www.silversandspoker.com

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) used by Silver Sands and found that the RNG complies with the relevant standards.*

The RNG uses a widely recognized algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated shuffling for single deck of cards (without jokers). The shuffling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the card sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

Signed:

A handwritten signature in black ink, appearing to read "Ian Manning", written over a horizontal line.

Ian Manning
Principal Consultant
iTech Labs Australia

27 March 2012

* The RNG was tested according to UK Gambling Commission, Isle of Man and Malta requirements.

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
