Random Number Generator Certificate

Operator: SC SINCRON SOFTWARE SRL
Operator URL: www.syncrogames.com

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) by SC SINCRON SOFTWARE SRL and found that the RNG complies with the relevant standards.*

The RNG uses a well known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated scaling for Numbers games. The scaling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the number sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

Date: 21 October 2015

* The RNG was tested according to Malta LGA Remote Gaming Regulations.

Disclaimer.
While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
