

Random Number Generator Certificate

Operator: Cosmo Gaming Company Limited

Operator URL: www.netbet.com

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) used by Cosmo Gaming Company Limited and found that the RNG complies with the relevant standards.*

The RNG uses a well known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated card shuffling for single decks (no joker, 1 joker and 2 jokers), 4 decks, 6 decks, 8 decks and 10 decks. iTech Labs has also evaluated scaling for roulette, dice and slot games. The shuffling and scaling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the card/number sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

26 July 2013

* The RNG was tested according to UK, Italy, Isle of Man and Malta Lotteries & Gaming Authority standards.

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
