

Random Number Generator Certificate

Operator: Wizard Gaming, Ltd.

URL: www.wizardgaming.com

This is to certify that [iTech Labs](http://www.itechlabs.com) has evaluated Wizard Gaming's Random Number Generator (RNG) used for the games in Wizard Gaming's Gaming System and found that the RNG complies with the relevant standards*.

This RNG uses a widely recognized algorithm to generate the random numbers. The numbers generated by the RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated the shuffling of the cards for all card games. Chi-squared tests were applied to over 1.5 million shuffled decks in 1 deck, 6 decks and 8 decks formats. The tests were applied to suits 1-4, ranks 1-13 and cards 1-52. iTech Labs has found that the card sequences are unpredictable and non-repeatable.

iTech labs has applied Chi-squared tests to scaled numbers for slot games, roulette games and dice games. These tests have indicated statistical randomness.

The certified code for the RNG has been fingerprinted.

1. AGCC standards are available at <http://www.gamblingcontrol.org/>
2. A high level description of iTech Labs Technical Standards is available at http://www.itechlabs.com.au/gaming/iTech_Labs_IGS_Standards.pdf

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
